Page 3: Technical Architecture and Infrastructure

The core indexing engine leverages FAISS with cosine similarity over 384-dimensional dense vectors.
The default embedding model deployed is sentence-transformers all-MiniLM-L6-v2.
The retrieval latency SLA is strictly under 150 milliseconds for 99 percent of requests.
All enterprise data is encrypted using AES-256 at rest and TLS 1.3 in transit.
The underlying vector index supports up to 10 million vector records per node.

Page 4: Security Policies and Compliance

DocuMind strictly treats all retrieved document passages as untrusted user data.
The system adheres to SOC2 Type II compliance and ISO 27001 certification standards.
All session states are strictly isolated to avoid cross-tenant data leakage.
System instruction injection attempts are blocked by prompt isolation boundaries.
Compliance audits are conducted bi-annually by an independent security advisory board.
